

# Compact Florescent Light Bulbs

MCREA offers a wide variety of compact florescent light bulbs to the general public at a drastically reduced price.

Switching from traditional light bulbs to CFLs is an effective, simple change everyone in America can make right now. Making this change will help to use less electricity at home and prevent greenhouse gas emissions that lead to global climate change.

Lighting accounts for close to 20 percent of the average home's electric bill. ENERGY STAR qualified CFLs use up to 75 percent less energy (electricity) than Incandescent light bulbs, last up to 10 times longer, cost little up front, and provide a quick return on investment.

## **CFL bulbs are for sale in the MCREA lobby at the following prices:**

ESL13T	13 Watt	60 Watt equivalent	\$ 1.00
