Your Electric Bill

(continued from other side)

Irrigation metering is different than other metering in the system. Because it is seasonal usage, it is billed according to demand and usage rather than according to a flat monthly fee plus usage. MCREA offers optional Irrigation Time-Of-Use rates as well. Please call (970) 867-5688 for details.

1 →

This date indicates the **due date for current charges**. If payment is not received after 15 days past billing date, a past due notice is mailed and service is subject to disconnect.

2 →

This number is your **meter number**. It is linked in our office with your location. When reporting a power outage or service problems, this number is most helpful to our dispatcher and line crews.

3 →

These numbers and/or words are your **location description**. (i.e., southeast sprinkler or well 21, etc.)

4 →

Your electric energy usage is measured in kilowatt-hours, or kWh (1000 watts = 1 kilowatt). The dates of your meter readings are recorded on this line as well as the previous and present readings. The difference between these two readings measures how many kilowatt hours were used that month. The 'Purchased Power kWh Rate' denotes the cost of purchasing our power from our provider, Tri-State Generation & Transmission, and the delivery of that power to MCREA's substations. The "MCREA kWh Rate" are costs associated with the distribution of electricity from MCREA's substations to your irrigation service.

5 →

This denotes your current kW reading and monthly kW charge (demand). Your monthly demand is your peak kW demand for that month. When your irrigation system is running during the months of April—October, it is establishing a demand reading. It measures the highest demand or load put on the system each month.

6 →

If you are on our Irrigation 1 Rate, you have a **facilities charge**, or monthly base amount charged for providing electric service. For existing member-consumers, this line item is calculated according to the highest monthly demand of the previous year. The facilities charge will bill during the months of March—August.

On a new service the facilities charge is calculated by these equations:

$$NPHP \times .746 \times .8 = \text{Minimum estimated peak} \text{ --- } \text{Estimated peak} \times \$ 4.87 = \text{Annual facility charge}$$

If you are on our Irrigation 2 Rate, you do not pay a **facilities charge if you run in the current month**. If you do not operate in the current month, a 'Facility Up-Charge' will apply. The line 'Regulatory Compliance Fee' denotes costs mandated to MCREA by outside entities (legislative mandates, EPA regulations, etc.) that are out of Morgan County REA's control. The line 'Energy Efficiency' denotes the cost for MCREA to offer energy efficiency products and services. These have been itemized by MCREA per member account.

7 →

This is your rate class code. You may refer to the MCREA rate sheet to determine your electric rate.

8 →

Each month, a bill message is included on the statement. The message is an alert to safety issues, events, or other information for MCREA members.

9 →

Additional information about your average daily electrical use and average daily cost is provided at the bottom of each bill.
